To download an eBook or audiobook onto the iPad:

You will need:
- Overdrive App version 2.0 (you can access from the App Store on your iPad)
- iOS software version 4.2.1
- Apple ID and password
- Your Library card number and pin for that library card
- Adobe ID & Password (if you don't have an Adobe ID yet – you can get one at www.adobe.com. Click on "sign in " and then click "create an adobe account")
- Connection to the internet

Steps:
1. Download the Overdrive App from the App store onto your iPad.
2. From the Overdrive App, select "Get Books" in the upper right hand corner of the screen
3. Select "Add a Library" and search for "Greenbrier County Public Library". Tap "Greenbrier County Public Library" (we have partnered with GCPL to save on administrative costs) and, then, tap "WV-READS".
4. From here you can search for eBooks to check out and download. **Note: EPUB titles are ebooks and MP3 titles are audiobooks.** Audiobooks usually come in parts because the files are so large, so depending on your internet connection, you may want to download one part at a time.
5. When you find a title that you want to check out, choose the EPUB version or MP3 version and tap "Add to Cart". (If it says "Add to Waiting List" all copies are checked out. You can put a hold on that item and you will be notified when it is ready to be checked out.) You will be prompted to enter your library card number at some point, so have it ready.
6. You can either "Continue Browsing" or "Proceed to Checkout" at this point.
7. When ready to checkout, you have the chance to change the "Lending period". Next tap "Confirm check out" when finished browsing.
8. With an item checked out, touch the gray button that says "Download".
9. The item will open in your Overdrive app (this is when you will be asked to authorize the iPad with an adobe ID – this should only happen the first time you check something out). It will begin to download.
10. You can then start to enjoy your new eBook or audiobook by tapping on the book's cover.

To return an eBook or audiobook early:
1. Tap on "edit" in the upper left hand corner of the Overdrive app screen.
2. Tap on the red circle next that appears next to the book you would like to return. Tap on the red "delete" button that appears and choose "Return then Delete" or simply choose "Delete" for an audiobook.
